PROFILE SUMMARY

Results-driven Senior IT Program Leader with 15+ years of experience steering \$100M+ enterprise transformation portfolios across Data Platforms, AI enablement, Cloud/SaaS, Data Center deployments and IT Infrastructure modernization. Proven expertise leading multi-program portfolios end-to-end from strategy to execution and governance. Expert at navigating SteerCo, ELT, and C-level stakeholder engagement within highly regulated, PCI DSS & other compliant environments. Recognized for scaling robust governance frameworks, driving predictable delivery velocity, and aligning global engineering teams to strategic business outcomes.

CORE STRENGTHS

- **Portfolio Leadership:** Enterprise Program & Portfolio Management (\$100M+ scale)
- **Cloud & Architecture:** Cloud & SaaS Transformation (Azure, AWS, Databricks - PaaS, Hybrid Cloud Environments)
- **Data & Emerging Tech:** Data Lake architectures & AI/ML Platform Delivery
- **Network & IT Infrastructure:** Modernization, Data Center & DR Build
- **Governance & Risk:** Program Governance (RAID logs, Financial Controls, PCI-Compliance)
- **Stakeholder Management:** Executive SteerCo, ELT, and C-suite Engagement
- **Team Leadership:** Global Cross-functional Team Leadership (30+ resources) & Vendor Management

KEY PROGRAMS (FLAGSHIP INITIATIVES)

- **Led end-to-end Data Lake & AI platform transformation program**, deploying cloud-based solutions (Azure, Databricks) enabling advanced analytics, automation, and scalable data processing across enterprise workloads
- **Impact:** *Achieved a 20–30% reduction in manual reporting and accelerated data-driven executive decision-making.*
- **Cloud & SaaS Transformation Program (Hybrid Architecture)** Delivered large-scale cloud modernization across AWS, Azure, and SaaS platforms featuring complex hybrid deployments.
- **Impact:** *Drove a 15–25% improvement in operational efficiency and enabled highly scalable enterprise architecture.*
- **Network & Infrastructure Modernization** Orchestrated global infrastructure transformations encompassing DR buildouts, automated failovers, and network modernization across data centers.
- **Impact:** *Realized a 25–40% reduction in critical incidents/outages, significantly strengthening platform resilience and risk posture.*

PROFESSIONAL EXPERIENCE

ACI Worldwide Ltd

Senior Project & Program Manager – Enterprise Platforms | Nov 2020 – Present

- Direct global enterprise transformation programs spanning Data Lakes, AI/ML enablement, Cloud/SaaS, and IT infrastructure modernization across complex, multi-region environments.

- Directed end-to-end program delivery pipelines, maintaining rigorous accountability for budgeting, financial forecasting, risk (RAID), and strategic governance across concurrent initiatives.
- Delivered enterprise Data Lake & AI programs (Azure, AWS, Databricks), unlocking a 20–30% reduction in manual tracking and introducing faster data availability pipelines for downstream analytics.
- Engineered a hybrid Cloud & SaaS migration program that captured 15–25% in systemic operational efficiency gains.
- Partnered with global engineering networks to modernize core infrastructure, netting a 25–40% reduction in production outages and shrinking lifecycle risks.
- Instituted standardized program governance frameworks and financial controls, improving overall sprint/delivery predictability by 20–30%.
- Overhauled change and service governance structures (SR/CR processes), raising engineering delivery velocity by ~30%.
- Managed and mentored cross-functional global teams of 30+ resources across engineering, data science, infrastructure, and third-party vendor ecosystems.

Infosys Ltd (Client: Telstra Corporation, Australia)

Project Manager – Data Center & Network Infrastructure | Feb 2019 – Nov 2020

- Managed large-scale network and data center transformation programs across a national Australian telecommunications footprint.
- Led the end-to-end infrastructure delivery of greenfield data center builds, complex network & data center migrations, and capacity upgrades.
- Commanded distributed, multi-vendor delivery teams to ensure all major milestones were executed cleanly within tight SLA boundaries.
- Guided critical infrastructure transitions through aggressive risk framing, resulting in zero business disruption during failovers.

Mahindra & Mahindra Ltd

Deputy Manager – IT Infrastructure | Oct 2010 – Feb 2019

- Led enterprise infrastructure programs supporting massive manufacturing frameworks and the global dealer ecosystem.
- Successfully provisioned and managed IT infrastructure across 24+ high-output manufacturing units and 1000+ national dealer locations.
- Conceptualized and deployed active-active data center architectures, vastly expanding business DR readiness and service resilience.
- Executed large-scale network tech refreshes and lifecycle modernization initiatives to support evolving corporate digital platforms.

CERTIFICATIONS

- **PMP® (Project Management Professional)** | PMI | *Credential #4393200*
- **CSM® (Certified ScrumMaster)** | Badge URL <http://bcert.me/soecyyzfu>
- **CCNA (Routing & Switching)** | Cisco | *ID: CSC0 12018493*
- **ITIL V3 Foundation** | *Certification #02304376-01-BJQN*

EDUCATION

- **Bachelor of Engineering (Information Technology)**
- **Diploma in Information Technology**
